RAFIC JOUEJATI

Web Designer & Developer
rjouejati@gmail.com · 5713376100

PROFESSIONAL PROFILE

Passionate about creating beautiful, dynamic, and user-friendly experiences on the Web. Brings over five years of website content development, technical IT project support, and managing large-scale websites and web apps with web content management systems like Drupal. Proficient in the latest technologies like JavaScript, HTML, CSS and their most popular libraries. Focused on improving workflow and effectiveness. One of my websites received a President's Award from the White House.

EDUCATION

- Full-Stack Web Developer, Professional Certificate George Washington University
- B.A., Economics, West Virginia University

AWARDS

- Certificate of Appreciation, Dept. of VA 2018
- Certificate of Commitment, Dept. of VA 2017
- Certificate of Excellence, Dept. of VA 2017
- President's Award by the White House 2015

EXPERIENCE

FRONT-END WEB DEVELOPER / HILTON HOTELS CORPORATION / 2018 - 2018

Part of Hilton's in-house creative agency, developing digital and print templates for on-property collateral in 34+ languages. All products are completed to client specifications, ensuring that hotel owners have access to all the resources they need to operate their hotels.

- Create UI pages and customizable document logic using a mix of scripting technologies and libraries like JavaScript and jQuery and front-end frameworks like Bootstrap.
- Work as part of a dynamic template development team; accurately test and correct projects completed by other members of the team through code repositories and bug tracking tools like Git, Target Process, and Jira.
- Collaborate daily with the business and project delivery teams to ensure content, campaigns, releases, and infrastructure are aligned with the development teams' output.

WEB DEVELOPER / DEPARTMENT OF VETERANS AFFAIRS / 2014 - 2018

Lead front-end designer and developer of easy-to-use and accessible UI pages with HTML5, CSS3, JavaScript, and jQuery technologies. Created the award-winning Veteran Entrepreneur Portal that resulted in a 78% increase in user portal utilization. **Generated 1713% more visits by Veterans.**

- Introduced new web page concepts and developed web request forms to ensure productivity and that projects are completed to deadlines which resulted in 25% less errors during production.
- Used wireframing software like Adobe XD to create and share interactive prototypes with team members and reviewers across devices and platforms. Closely followed design specifications to develop front-end responsive web applications accessible to a wide range of browsers, devices, and audiences.
- Built the web style guides to ensure high-quality web design and consistency, highlighting appropriate fonts and colors to tone of voice, photographic content, and key branding aspects. Quality assurance, A/B testing, adherence to Section 508, and troubleshooting web pages that led to significant user experience improvements.

WEB CONTENT SUPPORT / DEPARTMENT OF EDUCATION / 2012 - 2014

Created content, managed, and maintained multiple high-traffic public-facing website publications with Drupal content management system.

- Collected and analyzed web site traffic statistics which improved customer engagement.
- Created and managed multiple social media accounts including Facebook, YouTube, and Twitter.
